

Customer Information

The Ranch Hand - 4 is a patented utility device designed to fit both round and square trash bins. The notches make the unit fit round (rubber or metal) bins.

When used correctly – the Ranch Hand - 4 will save you time cleaning up while keeping you a safe distance from insects that bite, sticks that poke and any waste you do not want to touch. Just sweep or rake the debris into the bin.

We do not recommend any alternative applications. Misuse may cause injury to the operator and/or those in the surrounding area.

Image of attachable debris guide for use with square or rectangular trash container.

Guide Installation

When lifting the product out of the box or off the floor – use both hands securely as to not drop it on your foot or our toes, nor anyone else’s foot working with you. That’s why we made a handle.

NOTE: ALWAYS WEAR SHOES - Preferably Steel-toes, closed toe is good....

Open the lid of the bin completely. Using both hands, secure the guide slowly onto the lip of the trash bin with the slanted side – outward. If it is inward, the product will not be as effective.

With both hands on the trash bin, tip the bin over – slowly towards the floor.

Specifications

This product is made with reclaimed or recycled plastic. The product is thin, flexible and durable.

- Length: 15 inches
- Width: 20 inches
- Height: 4.0 inches
- Weight: 1 lb

Possible Danger

Wear shoes – preferable steel-toe for maximum protection from dropping the object on the foot. Treat this product as you would – a shovel.

Bin before use - and during use.

Saves...

Guide Use and Removal

Using a broom or rake – sweep the debris into the bin until the bin is full, or the waste is gone.

When finished - Stand up the trash bin by pulling the bin by the handle until the bin is in the standing- upright position.

Using both hands, grab the guide and lift the device slowly upward until it is removed from the lip of the bin.

Place the guide in a safe, secure location near the lawn tools. Treat this device with the same safety as you would a shovel. Or, you can just hang it on a nail.

The Ranch Hand should save you from repetitive bending, using two (2) tools at once, insect bites and stabbings from sticks and thorns... and most of all - it should save you time.

After using the product, please write to us and tell us how effective the product worked for you.
